The Microsoft Cloud

Supporting the critical infrastructure essential for public safety and security, health, national security, and the economy

Microsoft provides Cloud Services that support

- National security
- Governments
- Hospitals and healthcare
- Public security and safety
- First responders
- Banking and financial systems
- Communications
- And many more critical services

Utilities should prioritize keeping the datacenters that support Critical Infrastructure online

At Microsoft, we are committed to sustainability

2012 — Carbon neutral

2018 — 50%

2020 — 60%

2025 — 100%

Supply of renewable energy

2030 — Carbon Negative & Diesel-free datacenters

Zero Carbon 100/100/0

2050 — Removal of all historical carbon emitted directly or through electrical consumption
